

TAMAL SAHA

Junior Software Quality Assurance (SQA) Engineer

Dhaka, Bangladesh | +880 1670 867710 | tamalsaha700.ts@gmail.com | github.com/Tamal420

PROFESSIONAL SUMMARY

Detail-oriented Associate SQA Engineer with over 1 year of professional experience conducting end-to-end software verification cycles across 6+ live SaaS products. Demonstrated history of isolating complex functional defects, data sync vulnerabilities, and edge cases across Web, Android, and iOS platforms. Proficient in managing full defect lifecycles inside Agile frameworks using Jira and Postman to ensure stable production releases.

TECHNICAL SKILLS

Testing:	Manual · Functional · Regression · Smoke & Sanity · API · Mobile App · E2E · UAT · Cross-Browser · UI/UX
Tools & Utilities:	Jira · BrowserStack · Android Studio · Chrome DevTools · Git · GitHub
Automation:	Playwright (Python) · Automated Regression Testing · Basic Automation Framework Understanding
API & Database:	API Testing, Postman, Swagger, SQL Querying, MySQL, MongoDB
Language:	C · Python · Java · HTML5 · CSS

PROFESSIONAL EXPERIENCE

Associate SQA Engineer

January 2025 – Present

Kaz Software

Dhaka, Bangladesh

- Design and execute manual test cases for Web, Android, and iOS applications across 6+ live SaaS products within Agile/Scrum sprint cycles.
- Validate REST API endpoints using Postman and Swagger — covering schemas, authentication flows, error handling, and business logic edge cases.
- Perform regression, smoke, and sanity testing across staging and production environments ahead of every sprint release.
- Conduct cross-browser (Chrome, Firefox, Safari, Edge) and cross-device testing using BrowserStack and Android Studio.
- Log and manage defects in Jira with clear reproduction steps, severity labels, and evidence to accelerate developer resolution.
- Participate in sprint planning, standups, and retrospectives, providing QA insights for release readiness decisions.

SELECTED PROJECTS

WebEVV – Healthcare SaaS Platform

2025-2026

Web · Android · iOS | Tools: GitHub Kanban board, Postman, Swagger, SQL, Git, Android Studio, Playwright

- Tested appointment scheduling, patient authorization, billing, and EVV synchronization modules on a multi-state healthcare compliance platform.
- Identified critical billing defects and EVV sync failures via API validation and regression testing; verified data integrity using targeted SQL queries.
- Executed cross-platform test cycles across Web, Android, and iOS — ensuring consistent functional behavior across all supported environments.

ExpertEVV – Electronic Visit Verification SaaS

2025-2026

Web · Android · iOS | Tools: GitHub Kanban board, Postman, SQL

- Executed functional and regression testing for authorization workflows and invoice validation against healthcare regulatory standards.
- Discovered state-compliance data sync vulnerabilities during cross-platform testing and managed full defect lifecycle in Jira.

Hakma – Little Muslim Hub (EdTech)

2025

Web · Android · iOS | Tools: Jira, Postman, BrowserStack, Android Studio

- Tested subscription management, gamification mechanics, and content delivery across Web and mobile; performed cross-device testing on 10+ configurations in BrowserStack.
- Identified production-blocking defects in subscription renewal and gamification logic, enabling a successful pre-release fix cycle.

Bandscore9 – IELTS Mock Test Platform

2025

Web · Android · iOS | Tools: Google Sheets, Postman, Chrome DevTools, BrowserStack, Android Studio

- Validated mock test session flows, timed exam logic, subscription upgrades, and user authentication for a high-traffic IELTS preparation platform.
- Identified mobile score-calculation lag and subscription edge cases pre-release; tracked and verified all fixes through the Jira defect lifecycle.

Dignify – Digital Music Streaming & Marketplace

2026

Web · Android · iOS | Tools: Jira, Postman, Android Studio

- Tested authentication flows, payment gateway integrations, playlist management, and push notifications across Web and mobile.
- Identified critical authentication and payment edge cases pre-release, significantly reducing post-launch high-severity incidents.

Kreebo Learn – EdTech Platform

2025

Web · Android · iOS | Tools: Excel, Postman

- Tested AI-assisted learning features, quiz engine logic, gamification rewards, and responsive layouts across mobile and desktop.
- Executed post-feature regression cycles, contributing to a measurable reduction in post-release usability defects.

EDUCATION

Bachelor of Science – Computer Science & Engineering

Graduated: 2022

Southeast University, Dhaka, Bangladesh · CGPA: 3.50 / 4.00

Relevant Coursework: Software Engineering · Database Systems · Computer Networks · Algorithms & Data Structures

TRAINING & PROFESSIONAL DEVELOPMENT

Test Automation using Playwright with Python

2025 · In Progress

Global Tech Assure · Playwright scripting, data-driven testing, automated suite design, and CI/CD pipeline integration.

ADDITIONAL INFORMATION

Languages:

English (Professional Working Proficiency) · Bengali (Native)

Availability:

Immediate · Open to Full-Time, Hybrid, and International Remote Roles

Interests:

Test Automation · SaaS Quality Engineering · Usability Analysis · Agile Workflows
